Sub-Zero ROSES

A New Race of Hardiness previously unknown in ROSES. They are more vigorous, can live many times longer, are easier to grow, bloom more abundantly and more consistently, and their size, form and color compare with the best of the common Roses. Why? Because they are bred back to hardy species. They are super-hardy roses that absolutely won't kill out in temperatures that dip 25 degrees below zero. The technical meaning of our "Sub-Zero" is wood safe to about 15 degrees below zero unprotected; hilled up with a little clean dirt 25 degrees below and colder; well hilled up about 95% safe at 50 degrees below. Because they are so hardy we guarantee them unconditionally to live through one year without winter killing. Best of all they are free blooming, and the flowers last a long time. We are offering this unique strain of roses in Floribunda and one Climber, at following price: All varieties listed at left, \$1.75 each; 3 for \$5.00, not prepaid.

LAST!**

Each **\$2.75** Postpaid

TREE PEONIES are a low, many branched shrub, growing 3 to 4 feet high, bearing giant size flowers in many shades of red, pink, purple, white and bi-color. They have been grown in China for a thousand years, first in the gardens of the Ming emperors, where they gained the name "THE IMPERIAL FLOWER OF CHINA." The Chinese also call them "THE KING OF FLOWERS" because of their rare beauty and king-size blossoms. The flowers often measure 10 to 12 inches across, and have the texture of fine crepe silk. They are fragrant. They are hardy—long lived—disease resistant. Grow well in any climate. Have been known to withstand 40 degrees below zero temperature. Need very little care. The sparkle and beauty of TREE PEONIES in full bloom are beyond description, and are even more spectacular and beautiful than the finest hybrid Rhododendron.

When ordering, please give first, second and third choice in the following colors offered, as supply is limited and we know many colors will be exhausted within a few weeks after you receive this book.

Colors offered: Red, Pink, Purple, White and bi-color.

CRAG HERBICIDE 1

WEED KILLER

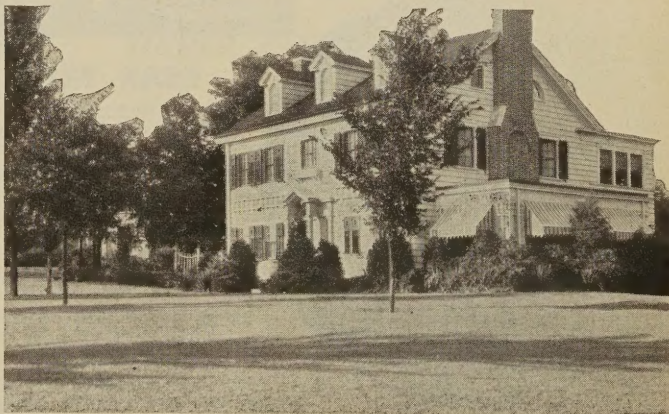

Why Be A Slave to your Enemy—the WEED? Use Crag Herbicide 1 and save all the work of keeping your garden free from weeds. This Herbicide prevents weeds before they grow. It kills weed seeds as they're starting to sprout. Crag Herbicide 1 is completely different in its action from most weed control chemicals such as 2, 4-D or contact herbicides; it can be sprayed directly on many established plants at the recommended dosage without causing injury. When Crag is in contact with the soil, however, it is changed to an active form which kills or stunts shallow planted germinating seeds as it is taken in through the young roots. No worry about drift damage when you use Crag Herbicide 1. Just follow the directions on the package. The effects last from 3 to 6 weeks. 1 ounce treats 3000 square feet. 4-ounce package \$1.50. Postpaid.
